

PANORAMA

EXTRA WIDE FIELD OF VIEW

- + A symmetric 210 x 75 degree field of view makes the Panorama a perfect environment for flight, driving, and training simulations.
- + It's also ideal for creating a feet-on-the-ground perspective for planetary surface exploration.
- + Designed to fit in spaces with a 9' ceiling, the Panorama is the best screen option for immersive projection in a standard-sized room.
- + The standard 4m Portal immerses 3-15 people; it's scalable to any size with both portable and permanent options.

SPECIFICATIONS
