

CASUAL IMMERSION

- + The Portal is a vertical dome environment designed for a casual interactive experience - perfect for museum exhibits, lobby displays and trade shows.
- + The screen shape creates a natural human field of view, with both ground and sky - ideal for visualizing architecture and interior spaces.
- + The Portal can also be oriented horizontally to create a small Theater-style display for greater immersion.
- + The standard 3m Portal immerses 5-15 people; it's scalable to any size with both portable and permanent options.
