

T H E A T E R

IMMERSION AND ACCESSIBILITY

+ Our patented dual-pressure technology makes the Theater the only dome on the market that doesn't require an airlock. Its 7' doorway remains fully open at all times, enabling wheelchair access and making it comfortable for both kids and adults.

+ The Theater's unique truncated screen design features a lowered springline, concentrating imagery in the audience's natural field of view for an enhanced sense of presence.

+ The standard size is designed to immerse a classroom or up to 25 adults at a time, but the design is scalable to meet any space requirements.

+ The Theater is ideal for outreach programs that require complete immersion for interactive, collaborative exploration of Earth and space science.

SPECIFICATIONS

+ Dimensions

- Internal Screen Diameter: 6.5 m (21')
- Width: 7.6 m (25')
- Height: 3.8 m (12.5')
- Depth: 7.9 m (26')
- Weight: 125 lbs
